Technology Mandatory

Our Year 8 Technology Mandatory students have recently completed their 3D farm model assessment tasks with great enthusiasm and creativity. This hands-on project allowed students to apply their design and construction skills while exploring agricultural concepts and sustainable farming practices. The detailed models showcase their understanding and commitment to learning, making this assessment a standout success.

Students Explore Astronomical Agriculture and Aboriginal Art on Recent Camp

A group of our students recently participated in an enriching astronomical agriculture excursion that combined science, culture, and creativity. During the camp, students engaged with the fascinating concepts of how Indigenous knowledge of the stars influences traditional farming practices.

In addition to their scientific explorations, students also had the opportunity to create Aboriginal art, drawing inspiration from the cultural teachings shared throughout the camp. This experience not only deepened their understanding of Aboriginal heritage but also encouraged artistic expression.

We are proud of our students for their enthusiasm and respect in embracing both scientific and cultural learning during this unique excursion.

Year 10 Students: Get Ready for Senior School!

As Year 10 students prepare to move into Year 11 next year, it's time to start thinking about your transition to senior school. One important step is purchasing your senior school shirt, which proudly identifies you as part of the senior cohort.

Senior shirts are available for purchase from the front office for \$25 each, now until the end of the year, and again at the start of 2026. Make sure you get yours early to wear with pride as you begin your senior studies!

If you have any questions, please contact the front office.
