# Principal's Report

What a fantastic term it has been at our school, filled with celebrations of achievement and milestones that reflect the hard work and dedication of our students and staff. It is always a pleasure to acknowledge the many successes that make our school community so vibrant and inspiring.

Our Year 12 students have been deeply engaged in their HSC Trials and are now in the final stages of preparation for the upcoming HSC exams. I want to extend my warm congratulations to our HSC Showcase nominees, Ruby and Paige, as well as our HSC Encore nominees, Luke and Ethan. We are incredibly proud of your talents and hope you have the opportunity to share them with the broader state community. Your commitment and passion are truly commendable.

Year 11 students have also shown great resilience and focus, with their preliminary exams going very well. They are now well-prepared and ready to begin their Year 12 journey in Term 4, and I look forward to seeing their continued growth and success.

One of the highlights of the term was the Year 12 Graduation and Formal — a spectacular event that beautifully celebrated the achievements of our graduating cohort. I would like to sincerely thank everyone involved in making this occasion so memorable, particularly Callan Obst, our Year Adviser, and our Head Teachers of Wellbeing and Relationships, Tania Kane and Sarah Bramwell. Your dedication ensured a night to remember for all.

At the end of my speech at the Year 12 Graduation, I shared a quote to instil a sense of gratitude, celebration, and hope for our graduating class. Recently, I began reading *The Book of Hope: A Survival Guide for Trying Times* by Jane Goodall, the world's most famous naturalist. Given the current state of the world and the environment, Jane encourages us to remember that hope is key. She writes:

“Hope is being able to see that there is light despite all of the darkness. Hope is believing that you can make a difference, that your actions matter. It is the courage to keep going when things seem difficult or uncertain. As you step forward into the next chapter of your life, remember that even small actions can create big change — and that hope is something you carry within you, always.”

Thank you, Year 12 of 2025. I hope you carry your time at MHS within you always. Congratulations on all you have achieved and best wishes for the future.

James Witchard  
Principal

## Year 12 Geography Excursion to Sydney

On the night of September 1st, our Year 12 Geography students, accompanied by Miss Watts, embarked on a memorable journey from Grafton train station at 9pm, arriving in Sydney early the next day for a fieldwork day at the Observatory Hill Environmental Education Centre (EEC).

Despite the 20+ hours of travelling for 5 hours of fieldwork, the students demonstrated resilience and dedication. They applied a variety of geographic skills to investigate the changes in Darling Harbour and evaluated the responses and strategies to these changes. Their behaviour throughout the excursion was exemplary, and they confidently answered all questions posed by Lauren, the EEC teacher.

The train journey itself was an unexpected lesson in the human experience, featuring a range of unusual events, including a police stop searching for a missing person, a medical emergency, another police stop to escort some stowaways and even a humorously questionable moment when the group had to be relocated due to an unfortunate, odorous foot issue. Many of these 'experiences' occurring within the first three hours of departing Sydney.

The day was not only educational but also enjoyable, providing valuable insights into the topic of Rural and Urban Places. This experience has undoubtedly enriched the students' understanding and appreciation of geography beyond the classroom.

## Important Dates

- 29 Sep - 10 Oct
  - School Holidays
- 13 Oct
  - Staff Development Day
- 14 Oct
  - Students return
- 15 Oct - 18 Oct
  - Cattle Show Team Lismore
- 20 Oct - 31 Oct
  - Tell Them From Me Survey
- 29 Oct
  - School Spectacular Combined Choir Rehearsal

# Year 12 Senior Study Hub

The Senior Study Hub at Maclean High School is now open! This quiet, supervised space provides personalised academic support for senior students, focusing on assessment tasks, workload management, and HSC preparation with resources like past papers, revision guides, and practice exams. A tutoring program will start next term.

Students are encouraged to engage actively, sign in during available lessons, and follow the Study Hub guidelines to ensure a respectful and productive environment. The Hub is open from 8:30 am to 4:00 pm, with extended hours during key assessment periods. The space is exclusively for Year 12 students—welcome to the 2026 Year 12s for Term 4! The 2025 Year 12s may also use it during Term 4 if they need a quiet place to study and prepare for their HSC exams.

During Term 3 Maclean High School was lucky enough to host the Macquarie University Roadshow for Year 10. Macquarie University has launched this initiative to extend the opportunities enjoyed by city students to rural schools, enabling our students to explore and envision the diverse university career pathways available to them. There were representatives from genetics, ecology, business, aged care and sport science, a weave and yarn session, and a representative from The Incubator, which is a start-up support initiative. Each station had post-grad students and lecturers running hands-on activities and information sessions that encouraged our students to experience an aspect of the area of study and ask questions about it.

The feedback from Macquarie about our Year 10 students was overwhelmingly positive, they have sent the school a message saying “the enthusiasm, curiosity, and thoughtful engagement demonstrated by your students were truly inspiring. Their willingness to explore future study and career pathways through our interactive rotations made a lasting impression on our team.”

Congratulations Year 10 on a great day! We are very grateful to Macquarie University for this opportunity, and we hope to see them again next year.

# Celebration Assembly

This month we held our Term 3 Celebration Assembly to acknowledge students with over 95% attendance for Term 3 and those students who are creating success through our PBL values. Congratulations to all the recipients!

On 11th September, we came together to celebrate R U OK? Day, a day that highlights the importance of checking in on how our friends, family, and colleagues are doing. By simply asking, "R U OK?", we can significantly impact and potentially save a life. Let's commit to continuing this practice every day.

A special thank you goes out to the Maclean Rotary Club for organising the BBQ and providing delicious sausages. We also appreciate Mission Australia for their quick contribution of sausages, which we enjoyed.

I am pleased to share that the funds raised from this event will be donated to the R U OK? Day organisation, which plays a vital role in promoting mental health awareness.

Let's keep the conversation going and make a change, one question at a time!

# R U OK? Day

# Nominees for Encore Individual Performances

**Ethan**

**Luke**

The following students Music Performances have been nominated for possible inclusion in ENCORE. Having a student from your school nominated for an HSC Showcase is an incredible achievement. Congratulations Ethan and Luke!

ENCORE presents a selection of outstanding major works by HSC Music students in NSW including performance, composition and musicology. It will be held at the Sydney Opera House on Monday 2 March 2026.

We are pleased to announce the following students' individual performances have been nominated for potential inclusion in OnSTAGE. Having a student from your school recognised for a HSC Showcase is a remarkable accomplishment. Congratulations! Paige: Living with the Enemy Ruby: The Thrill of the Chase OnSTAGE is an annual showcase featuring HSC Drama performances and individual projects. This year's event will take place at the Seymour Centre from Saturday, February 7, to Friday, February 13, 2026.

*Paige*

*Ruby*

# Transport NSW Talk Opens Doors for Future Careers

Students from Years 8 to 12 recently had the opportunity to attend an engaging and informative presentation from Transport for NSW, outlining their Traineeship and Apprenticeship Program. The session shed light on the wide range of career pathways available within the organisation, both locally and across the state.

The presentation introduced students to the various roles on offer, including trade-based apprenticeships and business and administration traineeships. Students learnt how these programs provide hands-on, paid work experience while also supporting further study, a great option for those looking to earn while they learn.

One of the key takeaways was the variety of opportunities available across NSW, including local roles that allow students to stay within their communities while building a meaningful career.

Students were also interested to hear about the many perks of working for Transport NSW, such as:

- Paid training and study
- Access to mentoring and career support
- Job security and progression opportunities
- The chance to contribute to large-scale infrastructure and public service projects that benefit the community

This eye-opening session helped students see that university isn't the only pathway to a successful and rewarding career and you can apply while you're in Year 10!

Make sure you check out Sentral regularly so you don't miss out on opportunities to apply for apprenticeships and traineeships like these.

# Science Week Brick & Brush Challenge

This year for Science Week Science and CAPA collaborated in a creatovation LEGO challenge, covering many areas of STEAM (Science, Technology, Engineering, Art and Maths). Students were given the opportunity to apply logic and creativity to subjects across the school, with house points given for participation and creativity. Students participated in challenges such as designing a mascot (the winner was a Garidi eagle!), designing a LEGO bridge that could hold weight (our winning bridge was able to hold several kilos!) and a scavenger hunt for LEGO bricks around the school. In-class challenges included Geography, Music and Art design challenges, and a scientific model challenge. The Mars rover model for the science challenge is on proud display in the science block and has had many admirers. Year 11 photography also built amazing models and photoshopped them into beautiful and creative backgrounds.

These challenges are designed to bring creativity and science together in a fun and engaging way. Everyone who participated did exceptionally well, and we hope to run more such challenges in the future!

After three terms of development, three nights of shows and a matinée performance, the School Production is a wrap! The students did an amazing job, successfully bringing together a two hour show that kept their audiences captivated. It was a silly play, a very silly play. A subversion of Shakespeare's greatest work, Hamlet, which turned tragedy into a farce that everyone could enjoy. It's no easy feat to remember two hours worth of lines and movement and then bring those lines to life under the lights, but these kids managed to do it with flair! They were dramatic, they were comedic, they were energetic and slick. They provoked laughter and applause in equal measure. The wonderful cast involved were: Ethan, Daniel, Paige, Ruby, Xavier, Isabelle, Layla, Grace, Sarah, Devika, Olivia, Charli, Savannah, Willow, Lucy, Tessah, Evie, Isobel, Charles, Leah, Noah, Elysia, Lillian, Taia, Isaac, Leo, Amber, Lani, Matilda, Gracie & Evie . The terrific crew involved were: Obelia, Phoenix, Piper, Annika and Olive. These students should all be very proud of their efforts. There's certainly no shortage of talent at Maclean High.

Mr Joe Wythes & Miss Melissa O'Neill

# Celebrating Student Leadership in Sport Officiating

Over the past term, a number of our Maclean High School students have made an outstanding contribution to local school sport by volunteering as referees, umpires, and officials across a range of sporting events. Their efforts have played a vital role in supporting our local feeder primary schools during their sports competitions, carnivals, and gala days.

Our students took on key officiating roles in soccer, touch football, basketball, netball, athletics, and cross country. In doing so, they not only ensured these events ran smoothly and fairly, but also acted as positive role models for the younger competitors.

Throughout these events, our students consistently demonstrated the core Maclean High School values of Respect, Effort, and Safety. They approached their responsibilities with maturity and integrity, encouraging younger students, providing constructive feedback, and helping them grow in confidence and skill. Their calm presence and clear communication helped foster an inclusive and supportive environment at each event.

The level of commitment shown, from giving up their time to developing leadership and teamwork skills is something our school community can be truly proud of. These students have represented Maclean High School with pride and professionalism, and we commend them for their service.

A big shout out to our year 12 leaders Logan and Decoda for all their help this year with Basketball and Soccer officiating.

To all those involved, thank you for being such excellent ambassadors for our school.

# Year 11 Timber Projects

[www.maclehan-h.schools.nsw.edu.au](http://www.maclehan-h.schools.nsw.edu.au) / 02 6645 2244

# Year 11 Timber Bedside Table Project

This term, our Year 11 Industrial Technology Timber students successfully completed their Preliminary HSC major assessment task – the design and construction of a fully functioning bedside table. This project challenged students to demonstrate their practical skills, creativity, and understanding of design principles while working with a range of solid timbers and manufactured boards.

Each student began the project by developing design ideas, considering both aesthetics and functionality. From there, they refined their plans, selected appropriate materials, and applied a variety of construction techniques to bring their designs to life. The finished products displayed a wide range of personal styles, from classic and traditional forms to modern and minimalist designs.

Throughout the process, students gained valuable experience in using both hand and power tools, improving their accuracy, joinery skills, and finishing techniques. Many incorporated additional features such as drawers, decorative edges, or contrasting timber types, highlighting their growing confidence and creativity in the workshop.

The completed bedside tables are a testament to the hard work and dedication of Year 11 Timber. They should be proud of the quality and individuality of their projects, which provide an excellent foundation as they prepare to begin their HSC year.

# Year 12 Timber Projects

[www.macleansh.schools.nsw.edu.au](http://www.macleansh.schools.nsw.edu.au) / 02 6645 2244

# Celebrating Year 12 Timber Major Projects

The TAS faculty at Maclean High School is proud to celebrate the achievements of our Year 12 Industrial Technology Timber students, who have recently completed their HSC major projects. These major works are the culmination of months of planning, design development, and dedicated workshop time. Each student is to be commended not only for the quality of their finished piece, but also for the persistence and problem-solving they demonstrated along the way.

This year's projects showcased an impressive variety of skills, creativity, and craftsmanship.

- Elora produced a striking zig-zag inlay coffee table, demonstrating precision joinery and attention to fine detail.
- Chelsea constructed a stylish and functional entertainment unit, combining modern design with practical storage solutions.
- Tully took on the challenge of crafting a hardwood serving bar, made out of paddock timber he milled himself. A large-scale piece requiring high level planning and perseverance.
- Malaki created a refined hall table, highlighting his ability to balance form and function in a sophisticated design.
- Abi Moran built a beautifully finished blanket box, showcasing both traditional woodworking skills and utilising the school laser cutter to add a personalised aesthetic design.
- Lara produced a standout whitewash serving bar, with a contemporary finish that adds character and flair.

Despite facing challenges with time, resources, and the natural hurdles that come with working in timber, all six students completed their projects ahead of the submission deadline. This is a testament to their determination, resilience, and the strong support provided within the TAS faculty.

As these students move beyond school and into the next stages of their lives, we congratulate them on their accomplishments and wish them every success for the future. Their efforts set an excellent example for younger students and highlight the high standard of practical learning at Maclean High School.

# Year 11 Textiles

This term, our Year 11 Textiles students have been hard at work on their Preliminary HSC assessment task, designing and constructing their own hoodie and pants. The project provided students with the opportunity to explore garment design, pattern adaptation, and advanced sewing techniques while also allowing for creativity and individuality in their finished products.

From the early stages of planning and fabric selection, through to construction and final fitting, students demonstrated strong organisation and perseverance. Many experimented with features such as pockets, embroidery, lining, and decorative finishes, tailoring their garments to reflect both personal style and functionality.

The completion of this task is a significant milestone in the Preliminary course, as it not only showcases students' practical ability but also their understanding of the design process and safe, accurate use of industrial sewing equipment. The finished hoodies and pants highlight the impressive growth in their technical skills and confidence.

# Year 10 Freakshakes

This term has been an exciting one for our Stage 5 Food Technology students, with both Year 9 and Year 10 completing creative and challenging assessment tasks.

Year 9 were tasked with designing and producing a birthday cake in class. Students had to interpret a chosen theme and bring it to life in cake form within a double period. The results were outstanding, with designs including construction sites, utes, ponds, Christmas themes, bright colours, florals, and many more imaginative creations. Their enthusiasm, creativity, and ability to adapt ideas into successful cakes were truly inspiring. Well done, Year 9!

Year 10 students were given the challenge of developing a food product concept in both theory and practice, culminating in the design and production of their own “freak shake.” Each student selected a theme and designed their shake for a specific target market. In addition to the product itself, students considered creativity, advertising, packaging, and presentation. The task was met with energy and excitement, and the final products were as fun as they were impressive. Year 10 approached this challenge with enthusiasm and should be very proud of their efforts.

# Year 9 Birthday Cakes

# Enter Your Woodwork Projects in the Jacaranda Wood Exhibition

The TAS faculty is encouraging all students who have completed woodwork projects this year to enter them into the Jacaranda Wood Exhibition. This event is a fantastic opportunity to showcase the talent, creativity, and craftsmanship of our students here at Maclean High School.

The competition is run by the Clarence Valley Woodworkers Association who are very supportive of our woodworking students. Entry is free, and there is \$1700 in cash prizes on offer across a range of student categories. The divisions are:

- Years 7 and 8
- Years 9 and 10
- Open (students from any year)

Whether you have built a small project in Technology Mandatory, or taken on something more ambitious in Industrial Technology Timber, the Jacaranda Wood Show is a chance to have your hard work recognised by the wider community.

Last year, our school enjoyed great success with multiple student projects being awarded prizes. This year, we would love to see even more entries from Maclean High School, and we are confident our students can continue that tradition of excellence. Students of all year levels are encouraged to get involved. Gain recognition for your skills, showcase the pride and quality of work produced in the workshop, and potentially win a cash prize!

If you would like to take part, please bring your project to the TAS staffroom by the end of Week 1, Term 4 or see Mr Francis.

# Connecting Minds

Last year 20 students at Maclean High were given the opportunity to participate in the Connecting Minds project run by One Giant Leap Australia. This project involves Australian schools connecting with a Japanese school to perform a research project to solve a particular problem involving humans living in space. Students needed to propose their own research question, and, with the help of experts in the field, find a solution to the problem. At the end of the project students got to present their findings at the World Expo in Osaka.

There are only ten Australian schools participating in this project, and only two of those schools are public schools. Out of all the schools we had the most teams, and our research was consistently praised by One Giant Leap Australia for being innovative and thorough. The students involved gave up a huge amount of time, working and collaborating with their partner school on weekends, holidays, lunch, recess, before school and after school. Here are our teams:

Team 1: Takoyaki Demo Quokka (Emilie, Tayla, James and Aila). Mission focus: How to maintain health in space, specifically the retention of muscular integrity.

Team 2: Space Invaders (Lucy, Lachlan, Savannah, Alice and Olivia). Mission focus: How to provide energy for sustainable housing on Mars.

Team 3: JASIT (Japanese Australian Space Initiative Team) (Bodhi, Isabella, Patsy and Alyssa). Mission focus: Methods for collecting and recycling space debris.

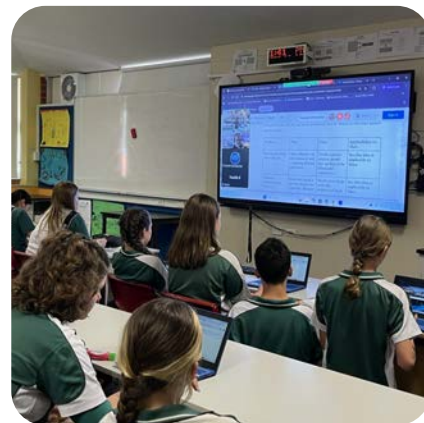

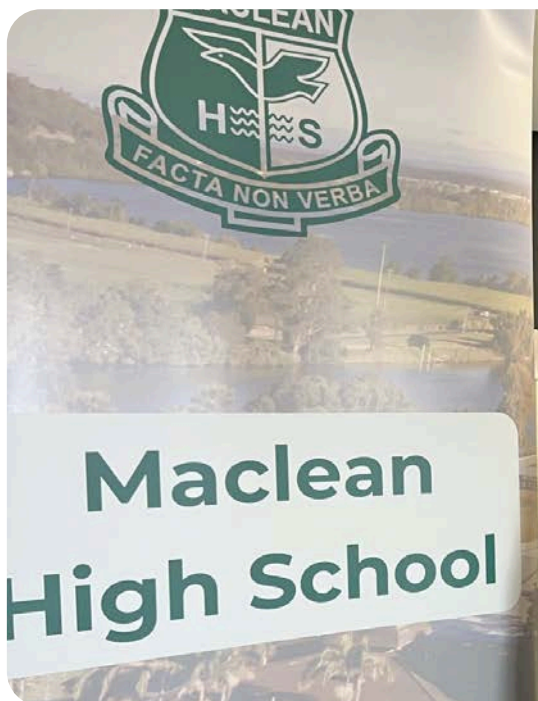

Team 4: Galactic Entrepreneurs (Maliyah, Evie, Makenna, Sophia and Rayson). Mission focus: How to grow plants on the Moon to create fuel for backup generators.

On Sunday 21/09/25 our students got to present the findings from their year-long research project at the Australian Pavilion at the World Expo in Osaka. Eve, our student mentor who has run the project with great skill and enthusiasm, joined two of our team members, Emilie and Alice, in Japan to represent our school in person. This was an incredibly exciting opportunity for our students, and was made possible in part due to the Iluka, Maclean and Yamba Rotaries who donated money to assist our students to get overseas. We are also extremely grateful to the Maclean High School P&C who managed the funds for us.

This was a literal once-in-a-lifetime opportunity for our students, it involved an enormous amount of time, effort and dedication. The presentations were flawless, our students spoke in front of hundreds of people both in person and online, including representatives from the Australian Space Agency. The presentations also had to be coordinated with their Japanese teammates, which was not an easy feat. Everyone talked about how fantastic our students were, and how our students overseas presented with maturity and professionalism. The importance of this achievement cannot be overstated, these students have done something that most adults would struggle to achieve. We could not be more proud of their efforts and I'm sure every one of these students will go on to achieve great things in the future!

# Connecting Minds

# Royal Adelaide Show

Congratulations Bryson, on achieving third place at the Royal Adelaide Show in the National Poultry Young Judges Competition!

The Term 3 100% attendance Laptop winner is Isabella. Congratulations

## Term 3 100% Attendance Winner

## I need to collect my child early

### What you need to do:

If you need to collect your child early from school, to reduce disruption during class time, it would be appreciated if you could send a note to school with your child to present at the attendance office before school.

## If I'm sick at school

### What you need to do:

- Let your teacher know that you feel sick
- Your teacher will write you a note to present to the attendance office
- The office will call your parents/carers to take you home

## distances & what to bring

Junior distances	Senior distances
<p><b>Under 7's:</b> 50m / 1km / 500m Stay on footpath (UP's must have a parent with them on the bike leg to the creek case)</p> <p><b>Ages 7-9-year-olds</b> MICRO: 100m / 2km (1 Lap) / 1km Run 1 lap</p> <p><b>Ages 10-11-year-olds</b> MINI: 200m / 5km (3 Laps) / 1km Run 1 lap</p> <p><b>Ages 12+</b> MONSTER: 300m / 10km (5 Laps) / 2km Run 2 laps</p> <p>These are the maximum distances allowable for age. Your child can do shorter distances if requested.</p>	<p><b>Senior Sprint:</b> 500m pool swim/ 18km bike (10 laps) / 5km run (5 laps)</p> <p><b>Senior Enticer:</b> 300m pool swim/ 9km bike (5 laps) / 2km run (2 laps)</p>
What to bring	Times & cost
<p>small towel</p> <p>swim leg: wear a tri suit or bathers, goggles, cap</p> <p>bike leg: bike, helmet, runners for flat pedals or bike shoes for clip in pedals, t-shirt if not wearing a tri suit (torso must be covered)</p> <p>run leg: runners</p> <p>optional: hat, sunglasses, race watch</p>	<p>Course set up : 6:30am seniors start: 7am juniors start: 8am</p> <p>Juniors \$5 plus pool entry Seniors \$15 plus pool entry</p>

## Clarence Valley Community Halls Strategy

Help shape the future of Council's network of community halls

Complete the online survey about your hall. Scan the QR code below to get started:

Survey will be open until 31 October 2025

Community halls are places of important social connection. They provide opportunities for locals to interact with each other, participate in activities and come together in times of need.

Clarence Valley Council is inviting you to tell us about your community hall. We want to know what works, what can be improved and what's special about your hall.

Your feedback will help us to shape a 10-year strategy that can increase the importance and relevance of halls to the community.

The Clarence Valley Community Halls Strategy is expected to be exhibited in late 2025 and finalised and adopted by Council by Mid-2026.

Keep up to date with the project at Clarence Conversations.

Find out more: [clarenceconversations.com.au/](http://clarenceconversations.com.au/)
