ASSESSMENT BOOKLET - YEAR 9

Introduction

This booklet aims to give students, parents and caregivers information about the Stage 4 Assessment Policy and Schedules. Students, parents and caregivers are urged to read this booklet carefully. It is the responsibility of the student to be thoroughly familiar with the assessment process. Students who are unclear about procedures or their responsibilities should immediately arrange an interview with their Year Adviser, Careers Adviser or the Deputy Principal.

Students are expected to attempt all assessment tasks and to be present for all other learning experiences. Students are also expected to attempt all other assigned work such as homework, assignments and class work that may not be part of the assessment program but is still vital for students to achieve the outcomes of the course.

It is very important that students apply themselves to all the experiences of the course with diligence and sustained effort. In Year 9, 1.5 - 2 HOURS each night is considered the minimum amount of time students should give to their studies. This time will increase when assessment tasks, assignments and examinations occur. If this is balanced with regular exercise, a good diet and moderate social activities, students should have an enjoyable and successful year.

Course Requirements

For a student to be considered to have satisfactorily completed a course there must be, in the Principal's view, sufficient evidence that the student has:

- followed the course developed by NESA;
- applied themselves with diligence and sustained effort; and
- achieved some or all of the course outcomes.

At Cromer Campus any student in danger of not satisfying course requirements may receive a Letter of Concern for the following reasons:

- Unsatisfactory attendance resulting in lack of participation in course experiences
- Being ill-prepared or ill-equipped for class work preventing participation in course experiences
- Failure to complete set tasks
- Failure to complete homework
- Failure to complete assessment tasks
- Failure to complete practical tasks
- Lack of participation in class work
- Failure to submit or present for assessment tasks

School Assessment Policy

- 1.** Course guidelines set out the approximate timing for each task. Your class teacher will advise you in writing of the precise timing at least two weeks before the task is to be administered, and will at the same time inform you of the nature of the task and the outcomes to be assessed.
- 2.** It is the student's responsibility to be alert to the notification of tasks. In case of absences from school, students will need to check with their teachers immediately upon their return. Absence from school when notification is given out will not be considered as a reason for the granting of an extension of time for an assessment task.
- 3.** In Years 9 and 10 there will be a maximum of six tasks per year per course including one literacy task.
- 4.** The school has endeavoured to structure the timing of assessment tasks to limit non-examination tasks to three per week where possible.
- 5.** When the assessment task is returned to the student, teachers will supply the Grade awarded and written feedback as appropriate.
- 6.** Students must demonstrate that they are serious candidates by their regular attendance in lessons and satisfactory completion of assessment tasks. They must present themselves on time at the place specified for each assessment task or hand in each assessment task by the time specified.
- 7.** Students who complete all aspects of the assessment task and submit it on or before the due date are eligible for the full grade allocated for the task. Students who fail to submit an assessment task by the due date or to attend an assessment task at school may be given E grade if they have no valid reason (see point 9).
- 8.** Assessment tasks must be submitted to the teacher concerned as specified on the assessment task notification. Failure to do so may result in an E grade being awarded and a Letter of Concern letter being issued.
- 9.** Students who fail to attend an Assessment Task which is to be completed at school or to submit an assessment task by the due date but who have a valid reason (e.g. sickness) may be given an opportunity to do the task or an equivalent task at a later date. In exceptional circumstances it may be necessary to give an estimated grade. These students will need to follow the Illness, Accident or Misadventure Procedures. If the application is granted these students will be eligible for the full grade allocated to the task.

10. Students who submit an incomplete task on or before the due date are to be allocated a grade. This grade is to be based on the proportion of the task completed. The task does not automatically receive an E grade. As an example, if the task had six equally weighted components and a student attempted only three of these, that student would be eligible for up to 50% of the grade allocated to the task.
11. For examinations students must remain for the entire length of the examination. Students are subject to and required to comply with the procedures and rules published for examinations. Any student found to be disturbing the examination will receive an E grade for that task.
12. If a student submits a task which is deemed by the teacher to be a non-serious attempt, then an E grade may be awarded.
13. **MALPRACTICE** - An E grade will be recorded for tasks where malpractice is involved. Malpractice is defined as failing to comply with the assessment policy for Northern Beaches Secondary College Cromer Campus or dishonesty through cheating or plagiarising in Assessment Tasks or exams. **PLAGIARISM** is the theft of someone else's work. This includes copying the work of another person directly and intermingling it with their own work or simply presenting something that they did not write as your own. Cutting and pasting chunks of text from the net and presenting this as their own work is one example. Any assignments or assessment tasks submitted must be the student's own work. Plagiarism may result in the student receiving an E grade for that task. All students have the responsibility to protect their intellectual property (their own work). Students who are found to have knowingly allowed their work to be copied or who have given their work to another student may also receive an E grade for that task.
14. Students who choose to use a computer must ensure that work is handed in on time. Computer failure will not be accepted as a reason for lateness. Students should ensure that adequate backup systems are in place and that a hard copy is produced well in advance.
15. School Reports will include Achievement Grade, Areas of Learning, Overall Achievement Distribution, Class Attendance, Behaviour Expectations - Social and Learning Skills and teacher comments for each course.

A-E Common Grade Scale

The Common Grade Scale shown below is used to report student achievement in both primary and junior secondary years in all NSW schools.

The Common Grade Scale describes performance at each of five grade levels.

A Outstanding	Your child's achievement in this subject is outstanding. They confidently apply their knowledge and skills in a range of new and complex situations.
B High	Your child's achievement in this subject is high. They confidently apply their knowledge and skills in a range of familiar and new situations.
C Expected	Your child's achievement in this subject is at the expected standard. They apply their knowledge and skills in familiar situations.
D Basic	Your child's achievement in this subject is basic. They apply their knowledge and skills in familiar situations with support.
E Limited	Your child's achievement in this subject is limited. They apply their knowledge and skills in some familiar situations with significant support.

Examinations

Half Year and End of Year Examinations are required in some subject areas in Years 7 to 10. Students should check the assessment schedules to determine which of their subjects this relates to and prepare appropriately.

Book Organisation and Equipment

All students at Cromer Campus are required to bring an exercise workbook and the necessary equipment, ie such as multiple pens and a calculator, to class. It is an integral part of being successful in their learning.

Students are expected to write their work in their workbooks and keep the workbooks neat and organised. To demonstrate the importance of note taking and organisation, as well as bringing the necessary equipment, an A to E grade will be reported in the student school reports for each subject.

Illness, Accident and Misadventure Procedures

It is the responsibility of the student to be present for or to hand in tasks at the required time. Students should read the calendar carefully and note the dates for when your tasks are due. Failure to meet these requirements will result in severe penalties.

The only exception to this rule will be in the cases of illness, accident or unavoidable misadventure.

In cases of extended absence, a maximum time of two school weeks from the initial due date of the task will be allowed.

Students who are absent on the day a task is due must hand it in as soon as they arrive at school. If the task is to be completed in class, the student is expected to do this on the day that they return.

Students who are absent from school for school purposes such as authorised excursions should, as far as possible, submit assessment tasks before the activity. Otherwise assessment tasks should be submitted immediately on return to school.

The form can be found on the school website or obtained from the Student Welcome Centre during break times.

Outcomes	
IND5-1	Identifies, assesses, applies and manages the risks and WHS issues associated with the use of a range of tools, equipment, materials, processes and technologies
IND5-2	Applies design principles in the modification, development and production of projects
IND5-3	Identifies, selects and uses a range of hand and machine tools, equipment and processes to produce quality practical projects
IND5-4	Selects, justifies and uses a range of relevant and associated materials for specific applications
IND5-5	Selects, interprets and applies a range of suitable communication techniques in the development, planning, production and presentation of ideas and projects
IND5-6	Identifies and participates in collaborative work practices in the learning environment
IND5-7	Applies and transfers skills, processes and materials to a variety of contexts and projects
IND5-8	Evaluates products in terms of functional, economic, aesthetic and environmental qualities and quality of construction
IND5-9	Describes, analyses and uses a range of current, new and emerging technologies and their various applications
IND5-10	Describes, analyses and evaluates the impact of technology on society, the environment and cultural issues locally and globally

Students will have written tasks each week relating to the industry, materials and processes of Industrial Technology. This forms the Theory Portfolio.

Mathematics

Outcomes

MAO-WM-01	develops understanding and fluency in mathematics through exploring and connecting mathematical concepts, choosing and applying mathematical techniques to solve problems, and communicating their thinking and reasoning coherently and clearly
MA5-FIN-C-01	solves financial problems involving simple interest, earning money and spending money
MA5-FIN-C-02	solves financial problems involving compound interest and depreciation
MA5-ALG-C-01	simplifies algebraic fractions with numerical denominators and expands algebraic expressions
MA5-ALG-P-01	simplifies algebraic fractions involving indices, and expands and factorises algebraic expressions (Path: Adv)
MA5-ALG-P-02	selects and applies appropriate algebraic techniques to operate with algebraic fractions, and expands, factorises and simplifies algebraic expressions (Path: Adv)
MA5-IND-C-01	simplifies algebraic expressions involving positive-integer and zero indices, and establishes the meaning of negative indices for numerical bases
MA5-IND-P-01	applies the index laws to operate with algebraic expressions involving negative-integer indices (Path: Adv)
MA5-IND-P-02	describes and performs operations with surds and fractional indices (Path: Adv)
MA5-EQU-C-01	solves linear equations of up to 3 steps, limited to one algebraic fraction
MA5-EQU-P-01	solves monic quadratic equations, linear inequalities and cubic equations
MA5-EQU-P-02	solves linear equations of more than 3 steps, monic and non-monic quadratic equations, and linear simultaneous equations (Path: Adv)
MA5-LIN-C-01	determines the midpoint, gradient and length of an interval, and graphs linear relationships, with and without digital tools
MA5-LIN-C-02	graphs and interprets linear relationships using the gradient/slope-intercept form
MA5-LIN-P-01	describes and applies transformations, the midpoint, gradient/slope and distance formulas, and equations of lines to solve problems (Path: Adv)
MA5-NLI-C-01	identifies connections between algebraic and graphical representations of quadratic and exponential relationships in various contexts
MA5-NLI-C-02	identifies and compares features of parabolas and exponential curves in various contexts
MA5-NLI-P-01	interprets and compares non-linear relationships and their transformations, both algebraically and graphically (Path: Adv)
MA5-MAG-C-01	solves measurement problems by using scientific notation to represent numbers and rounding to a given number of significant figures
MA5-TRG-C-01	applies trigonometric ratios to solve right-angled triangle problems

Outcomes

MA5-TRG-C-02	applies trigonometry to solve problems, including bearings and angles of elevation and depression
MA5-TRG-P-01	applies Pythagoras' theorem and trigonometry to solve 3-dimensional problems and applies the sine, cosine and area rules to solve 2-dimensional problems, including bearings (Path: Stn, Adv)
MA5-TRG-P-02	establishes and applies the properties of trigonometric functions and finds solutions to trigonometric equations (Path: Adv)
MA5-ARE-C-01	solves problems involving the surface area of right prisms and practical problems involving the area of composite shapes and solids
MA5-ARE-P-01	applies knowledge of the surface area of right pyramids and cones, spheres and composite solids to solve problems (Path: Stn, Adv)
MA5-VOL-C-01	solves problems involving the volume of composite solids consisting of right prisms and cylinders
MA5-VOL-P-01	applies knowledge of the volume of right pyramids, cones and spheres to solve problems involving related composite solids (Path: Stn, Adv)
MA5-GEO-C-01	identifies and applies the properties of similar figures and scale drawings to solve problems
MA5-GEO-P-01	establishes conditions for congruent triangles and similar triangles and solves problems relating to properties of similar figures and plane shapes (Path: Ext)
MA5-GEO-P-02	constructs proofs involving congruent triangles and similar triangles and proves properties of plane shapes (Path: Ext)
MA5-DAT-C-01	compares and analyses datasets using summary statistics and graphical representations
MA5-DAT-C-02	displays and interprets datasets involving bivariate data
MA5-DAT-P-01	plans, conducts and reviews a statistical inquiry into a question of interest (Path: Stn, Adv)
MA5-PRO-C-01	solves problems involving probabilities in multistage chance experiments and simulations
MA5-PRO-P-01	solves problems involving Venn diagrams, 2-way tables and conditional probability (Path: Adv)
MA5-RAT-P-01	identifies and solves problems involving direct and inverse variation and their graphical representations (Path: Stn, Adv)
MA5-RAT-P-02	analyses and constructs graphs relating to rates of change (Path: Stn, Adv)
MA5-POL-P-01	defines, operates with and graphs polynomials and applies the factor and remainder theorems to solve problems (Path: Adv, Ext)
MA5-LOG-P-01	establishes and applies the laws of logarithms to solve problems (Path: Adv)
MA5-FNC-P-01	uses function notation to describe and graph functions of one variable and graphs inequalities in one and 2 variables (Path: Adv)
MA5-CIR-P-01	applies deductive reasoning to prove circle theorems and solve related problems (Path: Ext)
MA5-NET-P-01	solves problems involving the characteristics of graphs/networks, planar graphs and Eulerian trails and circuits (Path: Stn)

Outdoor Education

Outcomes	
OE5-1	participates safely in outdoor education activities demonstrating knowledge of natural environments
OE5-2	investigates natural environments and their role in promoting health and wellbeing
OE5-3	analyses the benefits of participation in experiences in natural environments to promote personal growth, health and wellbeing
OE5-4	explains and apply key considerations and skills related to planning and preparing for outdoor education activities
OE5-5	applies risk management techniques in outdoor education activities
OE5-6	understands first aid and emergency response procedures relevant to outdoor education activities
OE5-7	demonstrates skills and knowledge for relationship building and effective group functioning
OE5-8	demonstrates actions and strategies that contribute to enjoyable participation in outdoor education activities
OE5-9	demonstrates interpersonal and self-management skills to achieve personal and group goals in outdoor environments
OE5-10	explains the relationship between environments and the health and wellbeing of people
OE5-11	describes the impact of participation in practical outdoor education activities on natural environment/s over time
OE5-12	proposes ways in which natural environments can be protected and/or managed

Personal Development, Health & Physical Education (PDHPE)

Outcomes	
5.1	assesses their own and others' capacity to reflect on and respond positively to challenges
5.2	researches and appraises the effectiveness of health information and support services available in the community
5.3	analyses factors and strategies that enhance inclusivity, equality and respectful relationships
5.4	adapts and improvises movement skills to perform creative movement across a range of dynamic physical activity contexts
5.5	appraises and justifies choices of actions when solving complex movement challenges
5.6	critiques contextual factors, attitudes and behaviours to effectively promote health, safety, wellbeing and participation in physical activity
5.7	plans, implements and critiques strategies to promote health, safety, wellbeing and participation in physical activity in their communities
5.8	designs, implements and evaluates personalised plans to enhance health and participation in a lifetime of physical activity
5.9	assesses and applies self-management skills to effectively manage complex situations
5.10	critiques their ability to enact interpersonal skills to build and maintain respectful and inclusive relationships in a variety of groups or contexts
5.11	refines and applies movement skills and concepts to compose and perform innovative movement sequences

Physical Activity and Sports Studies (PASS) PS1 & PS2

Outcomes	
PASS5-1	Discusses factors that limit and enhance the capacity to move and perform
PASS5-2	Analyses the benefits of participation and performance in physical activity and sport
PASS5-3	Discusses the nature and impact of historical and contemporary issues in physical activity and sport
PASS5-4	Analyses physical activity and sport from personal, social and cultural perspectives
PASS5-5	Demonstrates actions and strategies that contribute to enjoyable participation and skilful performance
PASS5-6	Evaluates the characteristics of enjoyable participation and quality performance in physical activity and sport
PASS5-7	Works collaboratively with others to enhance participation, enjoyment and performance
PASS5-8	Displays management and planning skills to achieve personal and group goals
PASS5-9	Performs movement skills with increasing proficiency
PASS5-10	Analyses and appraises information, opinions and observations to inform physical activity and sport decisions.

Psychology

Outcomes	
PSY5-1	explains how the field of psychology provides scientific explanations for the mind and behaviour through research, theories and approaches
PSY5-2	explains the main approaches to the study of the nature of human behaviour and the strengths and weaknesses of those approaches
PSY5-3	describes diversity and variation on the nature of personality, disease, disorders, intelligence and creativity and their influence on human behaviour
PSY5-4	explains a range of psychological theories and identifies the application of these theories to everyday life
PSY5-5	demonstrates an understanding of the importance of ethics in psychology, research and the interpretation of data
PSY5-6	recognises the applications and influence of psychology in popular culture and its importance to social factors
PSY5-7	examines suitable research methods including procedures and critical analysis when completing action based learning
PSY5-8	communicates psychological information and ideas using appropriate written, oral and visual forms

Science

Outcomes	
SC5-WS-01	<i>Observing</i> - Selects and uses scientific tools and instruments for accurate observations
SC5-WS-02	<i>Questioning and Predicting</i> - Develops questions and hypotheses for scientific investigation
SC5-WS-03	<i>Planning Investigations</i> - Designs safe, ethical, valid and reliable investigations
SC5-WS-04	<i>Conducting Investigations</i> - Follows a planned procedure to undertake safe, ethical, valid and reliable investigations
SC5-WS-05	<i>Processing Data and Information</i> - Selects and uses a range of tools to process and represent data
SC5-WS-06	<i>Analysing Data and Information</i> - Analyses data from investigations to identify trends, patterns and relationships, and draws conclusions
SC5-WS-07	<i>Problem-solving</i> - Selects suitable problem-solving strategies and evaluates proposed solutions to identified problems
SC5-WS-08	<i>Communicating</i> - Communicates scientific arguments with evidence, using scientific language and terminology in a range of communication forms

Textiles and Design

Outcomes	
TEX5-1	explains the properties and performance of a range of textile items
TEX5-2	justifies the selection of textile materials for specific end uses
TEX5-3	explains the creative process of design used in the work of textile designers
TEX5-4	generates and develops textile design ideas
TEX5-5	investigates and applies methods of colouration and decoration for a range of textile items
TEX5-6	analyses the influence of historical, cultural and contemporary perspectives on textile design, construction and use
TEX5-7	evaluates the impact of textiles production and use on the individual consumer and society
TEX5-8	selects and uses appropriate technology to creatively document, communicate and present design and project work
TEX5-9	critically selects and creatively manipulates a range of textile materials to produce quality textile items
TEX5-10	selects appropriate techniques and uses equipment safely in the production of quality textile projects
TEX5-11	demonstrates competence in the production of textile projects to completion
TEX5-12	evaluates textile items to determine quality in their design and construction

Visual Arts

Outcomes	
5.1	Develops range and autonomy in selecting and applying visual arts conventions and procedures to make artworks.
5.2	Makes artworks informed by their understanding of the function of and relationship between artist, artwork, world and audience.
5.3	Makes artworks informed by an understanding of how the frames affect meaning.
5.4	Investigates the world as a source of ideas, concepts and subject matter in the visual arts.
5.5	Makes informed choices to develop and extend concepts and different meanings in their artworks.
5.6	Demonstrates developing technical accomplishment and refinement in making artworks.
5.7	Applies their understanding of aspects of practice to critical and historical interpretations of art.
5.8	Uses their understanding of aspects of practice to critical and historical interpretations of art.
5.9	Demonstrates how the frames provide different interpretations of art.
5.10	Demonstrates how art criticism and art history construct meanings.
