

How Can We Care For The Wambuul

- 1.Improving water quality, protecting river ecosystems and engaging with our local waterways.
- 2.Reducing litter restoring natural habitats and improving water security and management practices.
- 3.Participate in initiatives focused on planting native trees, clearing little and restoring the rivers natural habitat.
- 4.focus on reducing pollution, managing water usage and supporting healthy ecosystems.
- 5.Minimizing pollution. Such as being mindful of chemicals and washing cars on grass. Securing bins and reducing runoff.
- 6.Managing water for environment flows to support native fish and wetlands
- 7.Protecting river health and promoting responsible water uses and community involvement.
