

REDHEAD PUBLIC SCHOOL

Our school vision underpins our high expectation culture, 'Empowering students to embrace the opportunities of quality education'. We strive for quality work, embrace new opportunities, and develop a school culture around our school values of 'Respect, Inspire and Succeed'.

Redhead Public School has a team of experienced and expert teachers who genuinely care for all students. We are fortunate to work in partnerships with families and are committed to providing personalised and individualised learning to ensure every child connects, succeeds, and thrives at our school.

COMMUNITY OF SCHOOLS

Whitebridge High School

Coming together
to provide
excellence
in public education

WHITEBRIDGE HIGH SCHOOL

Whitebridge High School is a proudly comprehensive high school that offers students the best educational opportunities, in an inclusive, safe and secure learning environment. We are committed to a broad, balanced and relevant curriculum that extends students in all areas of learning and develops their skills to be successful in our constantly changing world. The diverse curriculum is designed to support all students to grow as learners and to challenge students to achieve their best.

The curriculum places emphasis on the fundamentals of literacy and numeracy as well as catering for students' creative, technological, cultural, vocational and sporting interests and aptitudes through both curriculum courses and extra curricula programs. The school offers a unique wilderness program that enhances students' personal development and forms part of our strong focus on student wellbeing.

Whitebridge High School is a leader in addressing the opportunities arising from a rapidly changing world and educational landscape. We are at the forefront in offering Asian languages and cultural experiences to our students as well as aligning quality-teaching programs, assessment and reporting to the national curriculum.

Whitebridge High School offers quality environments that enrich learning and celebrates positive relationships between teachers, students, the school and our community.

We are a proud member of the Wiyellai Koa Community of Schools fostering and enhancing pathways for learning between partner primary schools and our high school so that students and their families can enjoy a high quality Kindergarten to Year 12 education experience.

The school is comprehensive in its curriculum and inclusiveness. We aim to achieve excellence and equity and incorporate extension programs for gifted and talented students and support programs for students with learning difficulties.

Whitebridge High School nurtures the qualities of respect, self-discipline, responsibility and courteous behaviour. We recognise, acknowledge and celebrate personal achievement as well as providing opportunities for students to learn good citizenship and community responsibility.

VOCATIONAL EDUCATION TRAINING (VET) AT WHITEBRIDGE HIGH SCHOOL

Whitebridge High School provides a unique opportunity for all students to achieve dual credentialing from their high school experience.

The school offers a comprehensive range of Certificate II and Certificate III Vocational Education and Training courses which support students to achieve nationally recognised workplace credentials through school-based learning and industry work placement.

For students electing to pursue a University pathway, there is an added benefit where a Cert III credential, completed during Year 11, is recognised as an ATAR equivalent of 67. A student may then achieve a higher ATAR through the HSC pathway.
