

LEAP@THS

Learning Enrichment and Acceleration Pathways

Application for Consideration 2026 – LEAP

LEAP is a program designed to provide academic enrichment and extension opportunities for high potential and gifted students. While most students enter the program during the transition from primary to secondary school, there are on occasion, additional opportunities for students in Years 7–10 to join a LEAP class.

Applications are now open for students who wish to be considered for placement in the LEAP program in 2026 should a position become available.

The Process:

1. Applications for Consideration are accepted by the LEAP Staff. The completed application will be submitted to the front office, given directly to LEAP staff or emailed to melynda.kain@det.nsw.edu.au
2. **If** a position becomes available in the appropriate class, all applications for consideration will be reviewed. A range of information — including class teacher recommendations, assessment results, reports and external data (e.g. NAPLAN results) — will be used to inform the decision.
3. An offer of placement will then be made to the selected candidate. If the offer is declined, a further offer **may or may not** be made, depending on available positions and the outcome of the review process.
