

High Potential Gifted Education

Intellectual Domain

At Zig Zag Public School, we are committed to providing High Potential and Gifted Education (HPGE) opportunities in the intellectual domain, fostering curiosity, critical thinking and a love of learning. As a well-resourced school, we provide students with a wide range of opportunities to extend and challenge their thinking through authentic, engaging learning experiences. Students are encouraged to participate in enrichment opportunities such as the Premier's Spelling Bee, a variety of writing competitions, the Solar Car Challenge and the Game Changer Challenge, where they work collaboratively to identify real-world problems, design innovative solutions and develop critical and creative thinking skills.

These opportunities are complemented by high-quality classroom programs that provide differentiation, extension and challenge across all key learning areas. Through inquiry-based learning, explicit teaching and opportunities for higher-order thinking, students are encouraged to think deeply, solve complex problems, innovate and reach their full potential both within and beyond the classroom.
