

High Potential Gifted Education

Physical Domain

At Zig Zag Public School, we are committed to providing High Potential and Gifted Education (HPGE) opportunities in the physical domain, enabling students to develop their skills, confidence and sporting potential. As a well-resourced school, we provide students with access to quality sporting equipment, facilities and a broad range of experiences that support participation and skill development. Students are encouraged to participate in Primary Schools Sporting Association (PSSA) carnivals and interschool team competitions across a wide range of sports, promoting teamwork, resilience and sportsmanship. We are proud to support students who achieve individual representation at district, regional and state levels, celebrating excellence and personal achievement in sport. These opportunities are complemented by rich classroom and school-based programs that encourage all students to develop healthy lifestyles, refine their physical skills and strive for personal bests. Through differentiated opportunities, quality coaching and inclusive participation, students are challenged to extend their abilities and reach their full potential both on and off the sporting field.
